Indiana State Administrative Code Requires Boundary Surveys to include a report by the surveyor presenting his opinion on the amount of uncertainty in the established boundary lines and corners. Causes of uncertainty and their consideration to this particular survey are as follows:

- A. Availability and Condition of reference monuments.
 - 1. #5 Rebar found in Southwest corner, Southwest quarter Section 26.
 - 2. BTR Rebars found in South line of Tract 2 of recorded survey of Eads property to West as referenced above.
 - B. Deed Descriptions.
 - 1. Recorded deed for church has overlap with Eads property to West. Approximately 107 feet by 125 feet.
 - 2. Southern property to East and South used to construct east and south boundaries. Title gap with approximately 11 feet. South line of Church property extended to close both adjoining properties. Eads property by C. Occupation.
 - C. Occupation.
 - 1. There are remnants of an existing fence along West line as described this survey.
 - D. Theoretical Uncertainty.
 - 1. Theoretical uncertainty due to instrument precision and implemented field techniques < 0.50 foot.
- Class of Survey = Class B as found in 865 IAC 12.

CERTIFICATION
I certify that this survey was performed under the direction of myself, a Land Surveyor licensed in the State of Indiana, and to the best of my knowledge and belief was executed according to 865 IAC 12.

REPORT OF SURVEY
#2335

In accordance with Title 865, 1-12-1 through 1-12-29 of the Indiana Administrative Code, the following observations and opinions are submitted regarding the various uncertainties in the locations of the lines and corners established on this survey as a result of:

- a) Variances in the reference monuments;
- b) Discrepancies in record descriptions and plans;
- c) Inconsistencies in lines of occupation and;
- d) Random Errors in Measurement (Theoretical Uncertainty);

The Theoretical Uncertainty (due to random errors in measurement) of the corners of the subject tract established this survey is within the specifications for a Class C Survey (0.50 feet) as defined in IAC 865.

The survey was performed at the request of Mr. Ken Eads. The subject parcels are in the names of Kenneth R. and Verla F. Eads, Deed Record 372, page 164, in the Office of the Recorder of Monroe County, Indiana.

REFERENCE MONUMENTS FOUND:

1. Kevin Potter 3/8-inch rebar with yellow cap stamped "Potter S0487" (Potter rebar), per his survey dated November 22, 1993; corner #273 per Potter survey.
2. Potter rebar marking right angle jog P.J. in Airline Road.
3. A 10-inch limestone post marking the East-West centerline of Airline Road extended at bend.

ESTABLISHMENT OF LINES AND CORNERS:

1. The East line of the subject parcels was established based upon a survey by Ray Graham, dated January 28, 1980, for Robert Shields. This parcel is now owned by DeLong (Deed Record 354, page 242). Potter on his survey found an iron pipe and a fence corner which match said Graham survey. Potter measured these corners as 130.45 feet record by Graham being 131.50 feet. These monuments were not recoverable at the time of this survey. These monuments were used to define the Graham survey.
2. The extent of the East line was defined by extending a line record distance (\$65.95 feet), from Potter rebar #1 discussed through the 10-inch limestone post.
3. The South line of the Southwest quarter of Section 26 was established based on said Potter survey. Coordinates were obtained from Mr. Potter from the endpoints of this line and an inverse 00 degrees 01 minutes 46 seconds different this survey on Potter survey. This is believed to be a scrivener's error based on computations with other mathematical relationships on said Potter survey. Reference monuments #1 and #2 discussed above were used to orient this survey to Potter's as well as Graham's to Potter's.
4. This line dividing Tracts #1 and #2 was established per the general request of Mr. Eads. A minimum of 2.5 acres must encompass each tract.
5. The remaining lines are bounded by the as-built centerlines of Handy Road and Airline Road.
6. The Handy Oneness Pentecostal Church (Deed Record 436, page 594) has a 64.3 feet deed enclosure. The point of beginning in this description places Handy Road 381 feet South of where it physically is based upon the relationship to the point of beginning of the subject deed. The subject deed refers to a school which is no longer standing as well as a bluff as its East line which was not located due to the existence of said recent surveys. These individuals, DeLong (Shields), and Southern do not call out the bluff in their deeds.

Subject to the above observations, it is my opinion that the uncertainties in the location of the lines and corners established on this survey are as follows:

Due to variances in reference monuments; 0.1 feet on Potter rebar found, up to 1 foot on 10-inch limestone post, centerlines of roads vary in location up to 2 feet for slight jogs, variable per the 00 degrees 01 minute 46 seconds bearing discrepancy South line Southwest quarter, of Section 26 from Potter dependent upon distance have led on any given line.

Due to discrepancies in the record description; noted above. Subject deed cannot be closed mathematically.

Due to inconsistencies on lines of occupation; none.
